## About Covered California

California was the first state to create a health benefit exchange following the passage of federal health care law. Covered California is charged with creating a new insurance marketplace in which individuals and small businesses can get access to health insurance. With coverage starting in 2014, Covered California will help individuals compare and choose a health plan that works best for their health needs and budget. Financial help will be available from the federal government to help lower costs for people who qualify on a sliding scale. Small businesses will be able to purchase competitively priced health plans and offer their employees the ability to choose from an array of plans and may qualify for federal tax credits. Covered California is an independent part of the state government whose job is to make the new market work for California's consumers. It is overseen by a five-member board appointed by the Governor and Legislature.

# About the Covered California Health Plans

---

## Making Health Care More Affordable

Covered California has tentatively selected 13 health insurance plans that will be available starting this fall. The plans will offer quality health care to millions of middle-class Californians in the individual market while providing consumers meaningful choices of exceptionally affordable health plans in every region of the state.

## What are Covered California health plans and why is this significant?

California is the first large state to identify plans and release premium costs under the federal Patient Protection and Affordable Care Act. The California law implementing the federal Affordable Care Act authorizes Covered California to establish and use a competitive process to select participating health plans. Covered California is required to set minimum requirements for participating carriers as well as standards and criteria for selected plans to provide health care coverage choices that offer the optimal combination of choice, value, quality and service.

Enrollees in Covered California health plans have the opportunity to select among a wide variety of provider network models and health care delivery systems. Health Maintenance Organizations (HMOs), Preferred Provider Organizations (PPOs) and Exclusive Provider Organizations (EPOs) are available in all urban and many rural areas, as well as various health care delivery systems available through our health plan partners.

Covered California has physicians and hospitals affiliated with:

- **Many of the state's leading academic health systems**
- **Six of the 17 Centers for Medicare and Medicaid Services Shared Savings Accountable Care Organizations**
- **Five of the six Centers for Medicare and Medicaid Services Pioneer Accountable Care Organizations**

In November 2012, more than 32 plans expressed interest in offering health care coverage in the Covered California marketplace. A total of 13 plans have been tentatively approved to offer coverage beginning this fall for enrollment starting in January 2014. The health plans tentatively selected to participate in Covered California will now have their proposed rates reviewed by their state regulator. After that review, Covered California will enter into final contracts with each health plan.

## How many people may be eligible for these plans?

There are 5.3 million Californians who may be eligible for coverage through Covered California. More than 2.6 million of those individuals may be eligible for tax subsidies to help pay for health care coverage.

## Which plans were selected?

The plans selected, in alphabetical order, are:

1. Alameda Alliance for Health
2. Anthem Blue Cross of California
3. Blue Shield of California
4. Chinese Community Health Plan
5. Contra Costa Health Plan
6. Health Net
7. Kaiser Permanente
8. L.A. Care Health Plan
9. Molina Healthcare
10. Sharp Health Plan
11. Valley Health Plan
12. Ventura County Health Care Plan
13. Western Health Advantage

These health plans meet all the state and federal requirements for plans as well as additional standards established by Covered California. They represent a mix of major insurers and smaller companies, regional and statewide providers, and for-profit and nonprofit plans. They deliver exceptional value and choice with affordable premiums, a wide choice of benefit levels, and good access to doctors and hospitals in all areas of the state.

## What benefits are included in the Covered California Health Plans?

The plans that will be offered through Covered California are guaranteed to provide basic levels of coverage and provide consumer protections set forth in the Affordable Care Act, including the ten Essential Health Benefits:

1. Ambulatory patient services
2. Emergency services
3. Hospitalization
4. Maternity and newborn care
5. Mental health and substance use disorder services, including behavioral health treatment
6. Prescription drugs
7. Rehabilitative and habilitative services and devices
8. Laboratory services
9. Preventive and wellness services and chronic disease management
10. Pediatric services

## Standard Benefit Design

Not only must each plan cover the Essential Health Benefits, they must also follow Covered California's standard benefit designs. With standardized benefits, consumers can accurately compare health insurance plans because the benefits are the same for all plans offered in the Covered California marketplace. Additionally, standardized benefits assures that the selected health plans define the consumer's and limit the consumer's out of pocket costs by type of service.

\*In most situations, this is true for one visit per year.

## What factors were considered during the selection process?

Principles adopted to guide the selection and oversight of plans included:

- Promoting affordability for the consumer, both in terms of premium cost and at point of receiving care;
- Assuring access to quality care for consumers presenting with a range of health statuses and conditions;
- Facilitating informed choice of health plans and providers by consumers;
- Promoting wellness and prevention;
- Reducing health disparities and fostering health equity;
- Working to reform the health care delivery system while being mindful of Covered California's impact on, and role in, the broader health care delivery system; and
- Operating with speed and agility and using resources efficiently in the most focused possible way.

## What is the average premium rate for California consumers?

Rates vary by region, by metal level and age. However, the chart below depicts a broad overview of average rates for Silver Plans offered across the state:

<b>Statewide Average Premium Rates</b> (for Silver Plans across all 19 Rating Regions)			
Lowest Silver Plan	2nd lowest Silver Plan	3rd lowest Silver Plan	Average of the 3 plans
\$304	\$325	\$335	\$321

## How did Covered California get these premium rates?

Health plans that were selected to offer coverage in the Covered California marketplace designed their provider networks with access, quality, and affordability in mind. In order to achieve all three factors, some plans included in their provider networks an integrated delivery system, which focuses on efficiency and quality as the main drivers of affordability. Other plans focused on prevention, care coordination, early intervention, and the health management of high-risk enrollees to achieve affordable rates. Overall, the health plans all focused on managing their membership to ensure they are getting the right care at the right time.

## How do these rates compare to small group rates?

It is impossible to make a direct comparison of these rates to existing premiums in the commercial market because in 2014 there will be new benefits and the actual change in premium will depend on an individual's insurance they have today. The best frame of reference for how good these rates are is by looking at current rates available in the small employer market in California. Each market is a competitive market with guaranteed issue. Comparing rates Covered California has achieved to comparable products in the current small employer market, our rates ranged from 2 percent above the 2013 average premium to 29 percent below the rates in California's most populous markets. This is impressive since the 2014 products include doctor visits, prescriptions, hospital stays and more essential benefits. Additionally there is financial protection like a maximum out-of-pocket cost of \$6,350 which will dramatically reduce the chances of someone filing bankruptcy because of medical bills.

## What are the bronze, silver, gold and platinum plans?

Covered California health plans will be offered in a tiered format with a choice of plans in each tier. The "metal levels" – bronze, silver, gold and platinum – define the level of coverage you pay as a patient compared to what the plan pays. The metal levels are defined by the Affordable Care Act and they are:

### Coverage Level

Metal Tier	Paid by health plan	Paid by consumer
Bronze	60%	40%
Silver	70%	30%
Gold	80%	20%
Platinum	90%	10%

If purchasing health insurance in the Covered California marketplace were similar to purchasing a vehicle, the bronze, silver, gold and platinum metal tiers would offer the exact same features no matter what dealer you purchase it from. Costs may vary, but the product is exactly the same, making apples to apples comparison shopping easy for consumers.

## **How will Covered California health plans improve quality of care?**

Covered California and each health plan selected are committed to ensuring high quality of care for all enrollees. Specifically, each plan must:

- **Ensure that each enrollee has had a preventive health and wellness visit during the first year of enrollment;**
- **Identify and proactively manage all “at-risk” enrollees;**
- **Determine enrollee’s health status and proactively develop a plan to manage their individual health care needs;**
- **Promote the use of best practice models for continuity of care and care coordination that are proven to improve quality of care;**
- **Be transparent about plan performance at the point of enrollment, specifically regarding standard measures of prevention, access, and clinical effectiveness; and,**
- **Be certified by the National Committee for Quality Assurance or URAC (formerly known as the Utilization Review Accreditation Commission) to meet quality standards.**

Health care you can count on.  
Service you can trust.

## **Actuarial Value**

A health plan's actuarial value is the percentage of total average costs for benefits that a plan covers. Starting in 2014, all health plans will have an actuarial value assigned to them — bronze, silver, gold or platinum. As the metal category increases in value, so does the overall percent of medical expenses that a health plan will cover. This means the platinum level plans will cover the highest percentage of health care expenses. These expenses are usually incurred at the point of receiving health care services – when you visit the doctor or the emergency room, for example. The health plans that cover the greatest percentage of health care expenses also have higher premium expenses.

## **Coinsurance**

Your share of the costs of a covered health care service, calculated as a percentage (for example, 20 percent) of the allowed amount for the service, is called coinsurance. You pay coinsurance plus any deductible you may owe. For example, if the health insurance plan's allowed amount for an office visit is \$100 and you have met your deductible for the year, your coinsurance payment of 20 percent would be \$20. The health plan pays the rest of allowed amount. The allowed amount is the amount the provider has agreed to accept for the care provided.

## **Copayment**

A fixed amount (for example, \$15) you pay for a covered health care service, usually when you receive the service. The amount can vary by the type of covered health care service.

## **Cost-sharing**

The share of costs for covered services that you pay out of your own pocket. This term generally includes deductibles, coinsurance and copayments, or similar charges, but it doesn't include premiums, balance billing amounts for non-network providers, or the cost of noncovered services. Cost-sharing in Medicaid and Children's Health Insurance Program also includes premiums.

## **EPO (Exclusive Provider Organization)**

Exclusive Provider Organization is a type of health care provider network product that offers a full array of covered benefits from a single provider network. Covered benefits are not paid for services rendered by a provider who is not part of the provider network except in the case of emergency or plan-approved care outside of the provider network.

## **Essential Health Benefits**

Health care service categories that must be covered by certain plans, starting in 2014. These service categories include ambulatory patient services, emergency services, hospitalization, maternity and newborn care, mental health and substance use disorder services, behavioral health treatment, prescription drugs, rehabilitative and habilitation services and devices, laboratory services, preventive and wellness services and chronic disease management, and pediatric services, including dental and vision care. Insurance policies must cover these benefits in order to be certified and offered in the marketplace, and all Medicaid state plans must cover these services by 2014.

## **Federal Poverty Level**

A measure of income level issued annually by the Department of Health and Human Services. Federal poverty levels are used to determine your eligibility for certain programs and benefits. In 2012, the federal poverty level for an individual was \$11,490 per year and \$23,550 for a family of four. ## **Health Insurance**

A contract that requires your health insurer to pay some or all of your health care costs for covered services in exchange for a premium.

## **HMO (Health Maintenance Organization)**

A type of health insurance plan that usually limits coverage to care from doctors who work for or contract with the HMO. It generally won't cover out-of-network care except in an emergency. An HMO may require you to live or work in its service area to be eligible for coverage. HMOs often provide integrated care and focus on prevention and wellness.

## **Out-of-Pocket Limit**

The most you pay during a policy period (usually a calendar year) before your health insurance or plan begins to pay 100% of the allowed amount. This limit never includes your premium, balance-billed charges or health care your health insurance or plan doesn't cover. Some health insurance or plans don't count all of your co-payments, deductibles, co-insurance payments, out-of-network payments or other expenses toward this limit. In Medicaid and CHIP, the limit includes premiums.

## **PPO (Preferred Provider Organization)**

A type of health plan that contracts with medical providers, such as hospitals and doctors, to create a network of participating providers. You pay less if you use providers that belong to the plan's network. You can use doctors, hospitals, and providers outside of the network for an additional cost.

## **Premium**

The amount that must be paid for your health insurance or plan. You and/or your employer usually pay(s) it monthly, quarterly or yearly.

## **Qualified Health Plan**

An insurance product that is certified by the California Health Benefit Exchange, provides Essential Health Benefits, follows established limits on cost-sharing (like deductibles, copayments and out-of-pocket maximum amounts) and meets other requirements. A Qualified Health Plan will have a certification by each exchange in which it is sold.

## **Subsidy**

Starting in 2014, cost-sharing subsidies and tax credits will lower the cost of premiums and out-of-pocket expenses for health coverage that qualifies families and individuals to purchase through Covered California.

## **Tax Credit**

One of the largest federal subsidy programs for health insurance, starting in 2014, to help consumers pay health insurance premiums. Tax credits are available exclusively for insurance purchased through Covered California will also be available to small businesses with no more than 25 full-time equivalent employees to help offset the cost of providing coverage.
